Examiner's Statement of Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The claims are directed to antibodies or antigen binding fragments thereof, which are variants of monoclonal antibody HUIV26, but retain the ability of the parent antibody to preferentially bind to denatured type IV collagen, as opposed to native, non-denatured type IV collagen. Moreover, the claims are directed to a finite number of such variants comprising one or more complementarity determining regions (CDRs), which differ from the corresponding, naturally occurring CDRs of the parent antibody by the particular substitution of one or more amino acids for others. While the particular substitutions to which the claims are specifically directed are disclosed as tolerable, if not beneficial, it would not be unexpected that at least a few antibodies that have the requisite structural features of the claimed antibodies, yet lack the requisite higher binding affinity for denatured collagen might exist; nonetheless, the Examiner finds no factual evidence teaching or reasonably suggesting that any particular antibody, which would otherwise be encompassed by the claims, would fail to preferentially bind to denatured collagen¹. Given, then, the finite number of antibodies that can be encompassed by the claims, it would not require undue and/or unreasonable experimentation to make and then determine if antibodies and/or fragments thereof having the requisite structural features also have the requisite function.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
